Objective:

As a recent graduate in Computer Applications, I am eager to kickstart my career as a Developer. Possessing a solid understanding of Java and web development fundamentals acquired through coursework and academic projects, I am enthusiastic about contributing my skills to a dynamic development team. Seeking an entry-level position to gain practical experience, enhance my programming abilities, and actively contribute to innovative projects.

Technical Skills:

JAVA

I have knowledge of Java's **OOP** principles, Utilization of **JDBC** for database connectivity, **Servlets** for HTTP request handling, and **Hibernate** for ORM, collectively forming a robust platform for scalable applications.

SQL

For querying the data present in the database, creating tables, views and applying complex functions to data and have practical knowledge of using sub-queries.

MySQL

I have a knowledge of **MySQL**, a rapid and reliable relational database system suitable for managing extensive data in various applications.

Web Designing

Well-versed in web technologies front-end development using **HTML**, **CSS**, **Bootstrap** and **Basics of JavaScript**, and experienced in creating dynamic and responsive web applications.

Operating Systems

Windows, LINUX.

Experience:

Internship in Web Technology at Mega Mind Computing Solutions.

Front-End Projects:
